

Assignment 3

Focus: Test plan

Specification: The document should contain the test plan, including

- a. Test dataset: Description of the format of the dataset for training and testing.
- b. Unit testing: Test cases with test data for classes that **support classification**. A unit test case can be for one single function, or a combination of functions of a class. Apply the techniques of equivalence partitioning and boundary checking.
- c. System-wise testing: Test cases with test data for **different scenarios** of a requirement. At least one test case per functional user requirement.
- d. Acceptance testing for non-functional requirements.
